Subject: FW: OPP Dicamba Assistance- update to SFIREG

From my memory... reduced number of samples and same requirement to go through the regional office.

Hi Yvette

As in 2018, the ACB lab can provide support for up to 2000 dicamba samples for this year. Requests for analytical support must be made through EPA Regional contacts

Thuy,

I'm at SFIREG and they would like to put out the word about Ft Meade analytical support. What can we send out for the 2019 growing season?

Yvette

Hi Jessica

Yes, the OPP is committed in providing laboratory support to those states that are affected by Dicamba, but do not have capability and/or capacity to analyze Dicamba samples.
Attached please find the e-mail from OPP Enforcement Coordinator, Yvette Hopkins, detailing procedures for States to request Dicamba lab support from OPP.

Please let me know if you need additional information.

Regards

Thuy Nguyen

Hi Jess,

Yes that is correct. Thuy's lab provides such assistance. I am copying her on this email so you two can connect. She has a specific procedure you go through to request analytical support from EPA.

Thanks,

Ping

Subject: OPP Dicamba Assistance

Hi, Ping!

Great seeing you last week... I'm revisiting my conference notes and you mentioned that OPP provides lab support for dicamba and metabolites, up to 300 samples per region? Since our LOD is not as low as we'd like and our demand doesn't justify purchasing a High Res mass spec, I'd be interested in sending our dicamba samples out. Can you provide me with further information?

Thanks so much-

Jessica L. Pruett
